- 9001.- Esquistos moscovíticos con biotita, granate y estaurolita LNx5  
9004.- Granate en esquisto plagioclásico LNx10  
9006.- Fragmentos con cuarzo y clorita en filita LNx6,3.  
9008.- Microconglomerado. LPx6,3  
9009.- Filita con mica marrón y carbonatos. LNx32  
9011.- Sulfuros con "pressure fringe" en cuarcita micácea LNx16  
9018.- Mármol micáceo LPx10  
9021.- Micropliegues en esquistos de dos micas con estaurolita y granate. LPx10  
9024.- Textura de microgranito biotítico (Balisa) LNx5  
9025.- Cordierita y biotita posteriores en filita mosqueada LNx5  
9026.- Textura de leucogranito albítico LPx16  
9026.- Granate en leucogranito albítico LNx10  
9027.- Agregado biotítico en leucogranito biotítico LNx5  
9028.- Granito biotítico con cordierita. LNx6,3  
9031.- Textura de monzogranito cordierítico LPx5  
9041.- Estructura en leucogranito protomilonítico LPx6,3  
9054.- Granito milonítico LPx10  
9059.- Aplita en granate LNx10  
9060.- Leucogranito, facies marginal LPx5  
9061.- Textura bandeada fluidal en porfido leucogranítico. Microfilms con cuarzo. LPx5  
9062.- Zonación de plagioclasa en monzogranito biotítico LPx5  
9068.- Textura porfidoclástica en leucogranito con turmalina LPx10  
9074.- Pequeño fenocristal de cuarzo con extinción ondulante en aplita moscovítica LPx10  
9077.- Cataclásis en leucogranito LPx5  
9078.- Textura de microdiorita LN x16  
9080.- Ortoneis glandular LPx5  
9080.- Andalucita con feldespatos en ortoneis glandular LNx16  
9084.- Alternancia de filitas y samitas LNx5  
9088.- Textura porfidoclástica en leucogranito LPx5
